I got this game due to its price and the many glowing reveiws. They left me a little concerned as they seemed to be mostly based on nostalgia for this game or for the genreVera.

It starts off a little rough with few actual tactical (per encounter) or strategic (long ranging) choices. The card management interface is clunky which is exasperated by the constant need to devise specialty decks. Each new non-grind opponent comes with his own specialty battlefield that harmonizes with their decks leaving you to more often than not have to rebuild your deck. About halfway through the first half every fight was pretty trivial using one or two decks, with no way of being able to anticipate which deck was the the good choice for the encounter. As you cannot ascertain what the specialty battlefield will be until you suffer it the first attempt.

Minor Spoiler

About halfway through you switch up your POV taking on a new Protagonist and reseting your deck. At this point the game lost what little enjoyment it had for me. You get zero options as far as deck configuration, so you have to play it as is, and it is not designed to handle the next few opponents. The battles were not complex or interesting, but as the battlefield was designed for them it become a long odds roll of the dice to win.

In the end I would say unless this was one of your early fell-in-love with games or you massively love the genre of early card games give this one a pass.. Just like the first one, but with a more streamlined interface and Nazis! Not realistically depicted Nazis, that you're supposed to empathize with and speak actual German, but the silly, over-the-top kind with broken English and everything!. Best DLC track pack to date. The Mars tracks introduce racing around the outside of tubes as a new mechanic and it feels great, invoking a lot of F-Zero memories. The tracks are also fairly lengthy with several hitting around 1:10 - 1:20 to make a full lap, which is welcome addition to some of the shorter tracks in other packs.

Thanks. I don't even have to play an hour and finish the tutorial to tell you that this game and it's entire series is rough around the edges. It feels like it was just thrown together last minute. The AI is horrible and very needy to your attention. Sometimes you don't even know what to do next because your AI troops are just wandering around exposing themselves to enemy fire.

I'm really glad I got the entire series on sale. Less than \$five for like 4 games and yea, I'm glad I didn't pay a dime more.

The game is ok and I'll recommend it on sale, but only on sale. It's not worth the full price at all even as cheap as it is.. Best spy game I've ever played.

This game is hard only because of the controls. clicking just to get out of aim down sight is a horrible game mechanic.. I couldn't explain why I bought, installed and played this game.

But I did.

Carry on.. I played it. It wasnt memorable enough for a more detailed review. I feel that i had fun playing it though. Maybe.. Really cool way to see some unique art from around the world. I'd love to see it expanded, perhaps to include entire museum collections.

Well implimented and easy to use/navigate. My only complaint is that I kept getting distracted by the brochure swapping between my two hands when I moved them close to each other, but that's a minor niggle. Otherwise a really great experience and well worth a go especially considering it's free.

If any more exhibts are added in I'll definatly get back in this.. After just beating chapter one, I can say that this is a fun, strange, and nice little point and click, I would reccomend it :3. A good game concept, but the graphics and physics are horrible. The terrain is broken and I always fall out of the ground
